Bradford Telecom is a Sales Rep for Tri West Sales

www.triwestsalesinc.com

Bradford Telecom Corporation is a company dedicated to representing quality companies in the telecommunications and electrical industry. Our goal is to help you increase profits not just revenues. We are an accomplished and motivated company combining over 20 years of technical experience with an unmatched commitment to total operational success, consistently driving dramatic sales growth and establishing extensive networks of productive relationships.

ACT Communications Inc. produces the finest electrical design products in its niche markets. Our expertise ranges from Power Quality Products (like Surge Protection & AC Filters) designed and priced for residential, commercial and industrial markets. ACT Communications also builds a full product range of Telecom Products (Surge Protection & Custom Electrical Assemblies) to special Commercial OEM Electronics (Custom Designs).

Justyn Tyme introduced the PatchSee Intelligent Patch Cord to keep Data Centers IT Departments and Telecommunications Centers running smoothly. The financial cost resulting from down network services and mission-critical applications can represent significant loss in many sectors, such as banking, e-commerce, telecommunications and industry.

LSS800A-LC

The **Magnepull** has developed a time saving product that is changing the installation industry. High strength magnets are used to pull lines through drywall or under carpets allowing technicians to save installation times of up to 70%.

Time is Money

The super strength magnets also work with metal studs and insulated walls making the tool extremely versatile for use in the electrical, alarm, voice, data, and video industries.
